RE: BAKER, DARRYL O.

#

19613-039

Dear Dr. Stathopoulos:

I saw Mr. Baker, your 41 year old who was struck in his left eye approximately two months ago. He is complaining at this point in time that his acuity although it has returned to normal he does get a feeling of double when he looks to the right. He also has a sensation of a foreign body in it.

On examination at this time, his acuity is 20/20 OU. There is definitely no proptosis and there is no enophthalmos. He does get diplopia. It is worse especially when he looks to the right and upwards. He does not get this looking straight ahead or down. So, he is really quite functional. I watched him walk around and he does not have to close the eye to walk.

He had a small calcium deposit in his meibomian gland in his lower lid. I removed it with tweezers. On examination of the retina he has no evidence of papilledema or compromise of any of the other structures.

I went over the CT scan. That is a very pretty picture of a floor fracture. At this point in time in the absence of diplopia in a straight ahead gaze, I still think that six more weeks of time is the answer. If at three months he definitely still has diplopia and it is causing him some serious problems it should be repaired. He still may completely clear. Fortunately despite the nastiness of this injury he sustained no obvious damage to his human lens, the anterior chamber angle or the retina.

Yours truly,

Robert J. Weiss MD

RE: BAKER, DARRYL

Dear Dr. Olson:

As you know we have been following Mr. Baker's clinical diplopia related to a punch that gave him a blow out fracture. He also has a little bit of anesthesia involving the infraorbital nerve branches. We have given it plenty of time now, almost five months. He still has entrapment; he can not look up with his left eye without experiencing a form of diplopia that gives him extreme imbalance. He does not think that he can function this way.

His acuity is 20/20 in both eyes when he wears his glasses. My advice at this point is to do a repair of blowout fracture, release the entrapment under general anesthesia. I will leave the final decision up to you.

Yours truly,

Robert J. Weiss, M.D.

p.s. The patient understand that one of the side effects of doing the operation when he does not have diplopia in down gaze, only up gaze, would be that he might develop diplopia in down gaze. There is no way that I can promise him that that couldn't happen.

Re: Darryl O. Baker
DOB: 6/30/1962
DX: Orbital Floor Fracture w/Entrapment
DATE OF EVAL: 4/15/04

Mr. Baker was seen April 15th. He had been struck in the left eye February 27th with a fist. He was complaining of blurred vision in both eyes. He does note that he gets double vision when he looks up. This is especially noticeable when he is weight lifting and doing, I believe, bent over rows and is looking straight ahead with his head tilted down.

His vision was 20/100 in the right eye and 20/200 on the left. This was easily correctable to 20/20 in either eye with an eyeglass prescription. The eyes were well aligned straight ahead. However, with up gaze the left eye did not elevate or look as far up as the right eye. I did not see any signs that the left eye was protruding further out or recessed into the eye more so than the right. The retina was normal.

The reports of the CT did suggest that there was some scarring of the floor of the orbit with possible adhesions to the inferior rectus muscle. Typically, in ophthalmology even with a fracture of the orbital floor, we like to wait at least two weeks to see that it heals on its own and the muscle entrapment is resolved. He is about six to eight weeks out and complaining of symptoms. Because he is well aligned at near, I think it would be better to take a conservative approach as the scarring is adherent to the muscle. However, it may be worthwhile to get a secondary opinion from an orbital plastic specialist who deals with these on a regular basis.

Thank you for allowing me to participate in Darryl's care. If you do not pursue an orbital evaluation, have him see me again in another three months.

Best regards,

N. Stathopoulos, MD

Nicholas A. Stathopoulos, M.D.

FEDERAL BUREAU OF PRISONS

memorandum

Ft. McKean, Pennsylvania

DATE: March 23, 2004
REPLY TO: *J. F. Sherman*
ATTN. OF: James F. Sherman, Warden

SUBJECT: INMATE REQUEST TO STAFF MEMBER

TO: BAKER, Darryl
Reg. No. 19613-039

This is in response to your letter receipted in my office on March 12, 2004, in which you state that you suffered an eye injury on February 29, 2004 and have not received medical treatment for it.

Records indicate you were medically assessed immediately following the injury. You were instructed to follow up with sick call as needed following that assessment. A sick call slip was never received by health services from you; however, on March 9, 2004, at the request of the Associate Warden, a PA stopped by to examine you. You became verbally abusive and belligerent with the PA. You were given an order to stop your abusive behavior which you refused to do. The PA was not able to conduct an exam at that time due to your behavior. You were instructed of the proper way to sign up for sick call at that time. A sick call request was received from you on March 9, 2004, and you were seen by a doctor on March 11, 2004. The exam revealed a left eyelid abrasion only. No other injuries were found concerning your left eye.

I trust your concerns have been addressed.

BP-S148.055 INMATE REQUEST 1. STAFF CDFRM
SEP 98

U.S. DEPARTMENT OF JUSTICE

FEDERAL BUREAU OF PRISONS

TO: (Name and Title of Staff Member) DOCTOR BEAM, M.D.	DATE: MARCH 28, 2004
FROM: INMATE BAKER, DARRY L	REGISTER NO.: 19613-039
WORK ASSIGNMENT: ORDERLY	UNIT: AA SHK AA

SUBJECT: (Briefly state your question or concern and the solution you are requesting. Continue on back, if necessary. Your failure to be specific may result in no action being taken. If necessary, you will be interviewed in order to successfully respond to your request.)

DOCTOR BEAM, THIS IS A SICK CALL REQUEST IN REFERENCE TO A INJURY FROM AN
ASSULT I RECEIVED TO MY EYE ON FEBRUARY 27, 2004. DOCTOR BEAM, MY EYE HAS
NOT FULLY RECOVERED AND I NEED MEDICAL ATTENTION. DOCTOR BEAM, WOULD YOU
PLEASE SET AN APPOINTMENT WHERE I CAN COME IN AND HAVE MY EYE EXAMINE.

THANK YOU.

SUBJECT: (Briefly state your question or concern and the solution you are requesting. Continue on back, if necessary. Your failure to be specific may result in no action being taken. If necessary, you will be interviewed in order to successfully respond to your request.)

DOCTOR BEAM, I HAD A CALL-OUT ON APRIL 28, 2004, AND MEDICAL STAFF SAID YOU CALLED IN SICK. DOCTOR BEAM, I WAS THE RECIPIENT OF DOCTOR STATHOPOULOS, M.D. MEDICAL REPORT WHEN I SAW HIM ON APRIL 15, 2004, AND HE INDICATED THAT I HAD SOME SCARRING OF THE FLOOR OF THE ORBIT WITH POSSIBLE ADHESIONS TO THE INFERIOR RECTUS MUSCLE. HE STATED THAT OPHTHALMOLOGIST LIKE TO WAIT TWO (2) WEEKS TO SEE IF IT WOULD HEAL ON ITS OWN OR SEE IF THE MUSCLE ENTRAPMENT IS RESOLVED. HE ALSO STATED THAT I WAS SIX (6) TO EIGHT (8) WEEKS OUT AND THAT I SHOULD GET A SECOND OPINION FROM AN ORBITAL PLASTIC SPECIALIST. DOCTOR BEAM I AM STILL HAVING EXCRUCIATING PAIN IN MY UPPER LEFT EYE AND I STILL SEE DOUBLE WHEN I LOOK UP, AND MY LEFT EYE DOES ELEVATE OR LOOK AS FAR UP AS THE RIGHT EYE.

RE: BAKER, DARRYL O.

#

19613-039

Dear Dr. Stathopoulos:

I saw Mr. Baker, your 41 year old who was struck in his left eye approximately two months ago. He is complaining at this point in time that his acuity although it has returned to normal he does get a feeling of double when he looks to the right. He also has a sensation of a foreign body in it.

On examination at this time, his acuity is 20/20 OU. There is definitely no proptosis and there is no enophthalmos. He does get diplopia. It is worse especially when he looks to the right and upwards. He does not get this looking straight ahead or down. So, he is really quite functional. I watched him walk around and he does not have to close the eye to walk.

He had a small calcium deposit in his meibomian gland in his lower lid. I removed it with tweezers. On examination of the retina he has no evidence of papilledema or compromise of any of the other structures.

I went over the CT scan. That is a very pretty picture of a floor fracture. At this point in time in the absence of diplopia in a straight ahead gaze, I still think that six more weeks of time is the answer. If at three months he definitely still has diplopia and it is causing him some serious problems it should be repaired. He still may completely clear. Fortunately despite the nastiness of this injury he sustained no obvious damage to his human lens, the anterior chamber angle or the retina.

Yours truly,

Robert J. Weiss MD

RE: BAKER, DARRYL

Dear Dr. Olson:

As you know we have been following Mr. Baker's clinical diplopia related to a punch that gave him a blow out fracture. He also has a little bit of anesthesia involving the infraorbital nerve branches. We have given it plenty of time now, almost five months. He still has entrapment; he can not look up with his left eye without experiencing a form of diplopia that gives him extreme imbalance. He does not think that he can function this way.

His acuity is 20/20 in both eyes when he wears his glasses. My advice at this point is to do a repair of blowout fracture, release the entrapment under general anesthesia. I will leave the final decision up to you.

Yours truly,

Robert J. Weiss, M.D.

p.s. The patient understand that one of the side effects of doing the operation when he does not have diplopia in down gaze, only up gaze, would be that he might develop diplopia in down gaze. There is no way that I can promise him that that couldn't happen.

Re: Darryl O. Baker
DOB: 6/30/1962
DX: Orbital Floor Fracture w/Entrapment
DATE OF EVAL: 4/15/04

Mr. Baker was seen April 15th. He had been struck in the left eye February 27th with a fist. He was complaining of blurred vision in both eyes. He does note that he gets double vision when he looks up. This is especially noticeable when he is weight lifting and doing, I believe, bent over rows and is looking straight ahead with his head tilted down.

His vision was 20/100 in the right eye and 20/200 on the left. This was easily correctable to 20/20 in either eye with an eyeglass prescription. The eyes were well aligned straight ahead. However, with up gaze the left eye did not elevate or look as far up as the right eye. I did not see any signs that the left eye was protruding further out or recessed into the eye more so than the right. The retina was normal.

The reports of the CT did suggest that there was some scarring of the floor of the orbit with possible adhesions to the inferior rectus muscle. Typically, in ophthalmology even with a fracture of the orbital floor, we like to wait at least two weeks to see that it heals on its own and the muscle entrapment is resolved. He is about six to eight weeks out and complaining of symptoms. Because he is well aligned at near, I think it would be better to take a conservative approach as the scarring is adherent to the muscle. However, it may be worthwhile to get a secondary opinion from an orbital plastic specialist who deals with these on a regular basis.

Thank you for allowing me to participate in Darryl's care. If you do not pursue an orbital evaluation, have him see me again in another three months.

Best regards,

N. Stathopoulos, MD

SUBJECT: (Briefly state your question or concern and the solution you are requesting. Continue on back, if necessary. Your failure to be specific may result in no action being taken. If necessary, you will be interviewed in order to successfully respond to your request.)

DOCTOR BEAM, I HAD A CALL-OUT ON APRIL 28, 2004, AND MEDICAL STAFF SAID YOU

CALLED IN SICK. DOCTOR BEAM, I WAS THE RECIPIENT OF DOCTOR STATHOPOULOS, M.D.

MEDICAL REPORT WHEN I SAW HIM ON APRIL 15, 2004, AND HE INDICATED THAT I HAD

SOME SCARRING OF THE FLOOR OF THE ORBIT WITH POSSIBLE ADHESIONS TO THE INFERIOR

RECTUS MUSCLE. HE STATED THAT OPHTHALMOLOGIST LIKE TO WAIT TWO (2) WEEKS TO SEE

IF IT WOULD HEAL ON ITS OWN OR SEE IF THE MUSCLE ENTRAPMENT IS RESOLVED. HE ALSO

STATED THAT I WAS SIX (6) TO EIGHT (8) WEEKS OUT AND THAT I SHOULD GET A SECOND

OPINION FROM AN ORBITAL PLASTIC SPECIALIST. DOCTOR BEAM I AM STILL HAVING EXCRUCIATING

PAIN IN MY UPPER LEFT EYE AND I STILL SEE DOUBLE WHEN I LOOK UP, AND MY LEFT EYE DOES

ELEVATE OR LOOK AS FAR UP AS THE RIGHT EYE.
